

Project Design Phase Problem – Solution Fit Template

Date	29 June 2026
Project Name	Library Book Request Management System
Maximum Marks	2 Marks

The Problem–Solution Fit for the **Library Book Request System** focuses on identifying the challenges faced by students and librarians in the book request and issue process and providing an automated ServiceNow-based solution that effectively addresses those challenges. The system improves efficiency by replacing manual, paper-based library request management with a transparent, secure, and automated workflow.

Purpose

- Automate the student book request and librarian notification process.
- Validate that the issue date is not in the past using Business Rules.
- Auto-generate a unique request number for each book request submitted.
- Automatically notify the librarian when a new book request is submitted for review.
- Maintain secure and centralized book request records using the ServiceNow platform.
- Provide a scalable and reliable library management solution that can be extended with additional features in the future.

Template:

1. CUSTOMER SEGMENT(S) <i>Who is your customer?</i> Students in a college who need to borrow books from the library.	6. CUSTOMER CONSTRAINTS <i>What constraints prevent your customers from taking action?</i> No real-time tracking, risk of past dates being entered, manual librarian notification.	5. AVAILABLE SOLUTIONS <i>What solutions are currently available?</i> Paper-based request forms, email requests, manual registers — none automated.
2. JOBS-TO-BE-DONE / PROBLEMS <i>Which jobs/problems do you address?</i> Students need to request library books digitally; librarians need instant notification upon request submission.	9. PROBLEM ROOTCAUSE <i>What is the real reason this problem exists?</i> Manual workflows and paper-based documentation with no validation or automated notification.	7. BEHAVIOUR <i>What does your customer do to address the problem?</i> Students fill paper forms; librarians manually check requests and update registers.
3. TRIGGERS <i>What triggers customers to act?</i> Student needs a book for study; librarian must process the request before stock runs out. 4. EMOTIONS: BEFORE / AFTER Before: frustrated by delays. After: satisfied with instant confirmation and automated notification.	10. YOUR SOLUTION <i>If working on an existing business, write your current solution first.</i> ServiceNow Zurich Platform Custom Table → Business Rule (date validation) → Auto-number → Email Notification to Librarian.	8. CHANNELS & EXCHANGES 8.1 ONLINE ServiceNow Portal — students submit book requests via the web form. 8.2 OFFLINE Email Notifications sent to librarian upon each request submission.
