

Project Design Phase-II

Data Flow Diagram & User Stories

Date	30 JUNE 202sta
Team ID	
Project Name	College Library Book Request System
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) represents the information flows within the College Library Book Request System. It illustrates how a student submits a book request, how the system validates the issue date, auto-generates a request number, and notifies the librarian.

DFD Overview — College Library Book Request System:

Entity / Process	Input Data	Output Data
Student (External Entity)	Student ID, Book Title, Author, Issue Date	Auto-generated Request Number, Confirmation Message
Submit Book Request (Process 1.0)	Filled Book Request Form with Issue Date	Validated Request stored in Book Request DB

Validate Issue Date (Process 2.0)	Proposed Issue Date entered by Student	Error if date is in the past; pass if valid
Auto-Generate Request No. (Process 3.0)	Validated Book Request	Unique Request Number (e.g. REQ-2025-0001)
Notify Librarian (Process 4.0)	Confirmed Request Details	Email / System Notification sent to Librarian
Librarian (External Entity)	Notification of new book request	Approval or Rejection of Request
Book Request DB (Data Store)	Validated Request Data	Stored records retrieved for librarian review

User Stories

The following user stories define the expected behaviour of the College Library Book Request System from the perspective of each user type.

User Type	Epic	USN	User Story / Task	Acceptance Criteria	Priority	Release
Student	Book Request Submission	USN-1	As a student, I can fill a custom book request form with book title, author, and issue date.	Request form is submitted successfully with all required fields	High	Sprint-1
		USN-2	As a student, I receive an auto-generated unique request number upon submitting my book request.	Request number is displayed and stored in the system	High	Sprint-1
	Issue Date Validation	USN-3	As a student, I am prevented from entering an issue date that is in the past.	System shows an error if past date is entered; only current or future dates are accepted	High	Sprint-1
		USN-4	As a student, I can select a future date for book issue from a date picker.	Date picker disables past dates	Medium	Sprint-1
Librarian	Librarian Notification	USN-5	As a librarian, I receive a notification whenever a student submits a book request.	Notification is received within 1 minute of submission	High	Sprint-1
		USN-6	As a librarian, I can view all book requests in a dashboard with request numbers and details.	Dashboard lists all requests with status and auto-generated number	High	Sprint-2
Administrator	System Management	USN-7	As an administrator, I can manage student and librarian accounts for library access.	Admin can add, edit, and deactivate accounts	Medium	Sprint-2
