

User Acceptance Testing (UAT) Template

Date	29 June 2026
Team ID	Individual Project
Project Name	Library Book Request Management System
Maximum Marks	4 Marks

Project Overview

Project Name

Library Book Request Management System

Project Description

The Library Book Request Management System is developed on the ServiceNow platform to automate the process of submitting library book requests. The system validates the issue date, generates a unique request number, stores request details, and automatically sends an email notification to the librarian.

Project Version

Version 1.0

Testing Period

27 June 2026 – 29 June 2026

Testing Scope:

- Book Request Form
- · Issue Date Validation
- · Request Number Generation
- · Record Storage
- · Email Notification
- · Request Status

Testing Environment:

Platform: **ServiceNow Zurich Developer Instance**

Application: **Library Book Request Management System**

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Submit Book Request	Fill the form and click Submit	Request submitted successfully	Request submitted successfully	Pass
TC-002	Enter Past Issue Date	Select a past date and submit	Validation error displayed	Validation error displayed	Pass
TC-003	Auto Generate Request Number	Submit a valid request	Unique request number generated	Request number generated	Pass
TC-004	Email Notification	Submit a valid request	Librarian receives email	Email received	Pass
TC-005	Record Storage	Submit a request	Record stored in custom table	Record stored successfully	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Past issue date accepted before Business Rule implementation	Enter past date and submit	Medium	Closed	Fixed using Business Rule validation

Sign-off:

Tester Name: Appalanaidu Chinni

Date: 28 June 2026

Signature: Appalanaidu Chinni

Notes:

- All planned test cases were executed successfully.
- Date validation works correctly.
- Request numbers are generated automatically.
- Email notifications are successfully sent to the librarian.
- The application satisfies the functional requirements.

ServiceNow interface showing the 'Library Book Request - Create LIB10009' form. The form includes fields for Number, Student Name, Student ID, Book Name, Author, Issue Date, and Status. Error messages are displayed at the top: 'Issue Date cannot be in the past.' and 'Invalid insert'. A 'Submit' button is visible at the bottom left.

ServiceNow interface showing the 'Emails View: Outbox' table. The table displays a list of email records with columns: Created, Recipients, Subject, and State. The records include restocking requests and a new library book request submitted by appalanaiduchinni942@gmail.com.
