Date	28 June 2026
Project Name	College Library Book Request System
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule & Estimation (4 Marks)

The following product backlog covers all user stories for the College Library Book Request System. Students request books from the college library using a custom form. Key system behaviours include: validating that the issue date is not in the past, auto-generating a unique request number, and notifying the librarian when a request is submitted.

Sprint	Functional Req. (Epic)	USN	User Story / Task	Story Points	Priority
Sprint-1	Book Request Form	USN-1	As a student, I can fill a custom book request form with book title, author, student ID, and issue date.	3	High
Sprint-1	Issue Date Validation	USN-2	As a student, the system validates that the issue date is not in the past.	3	High
Sprint-1	Request Number Generation	USN-3	As a student, the system auto-generates a unique request number upon form submission.	2	High
Sprint-1	Librarian Notification	USN-4	As a student, the librarian is notified automatically when my book request is submitted.	2	High
Sprint-2	Book Availability	USN-5	As a student, I can check real-time availability of a book before submitting a request.	2	High
Sprint-2	Request Status	USN-6	As a student, I can view the current status of my submitted book request.	2	High
Sprint-2	Librarian Approval	USN-7	As a librarian, I can approve or reject student book requests from the dashboard.	3	High
Sprint-3	Leave Record Mgmt	USN-8	As an administrator, I can maintain and view all book request records.	2	Medium
Sprint-3	Reporting	USN-9	As an administrator, I can generate reports on book request history and approvals.	2	Medium
Sprint-4	Security	USN-10	As an administrator, only authorized students and librarians can access the system.	2	Medium

Sprint-4	Testing	USN-11	As a tester, I can verify that the book request workflow functions correctly end-to-end.	2	High
Sprint-4	Deployment	USN-12	As an administrator, I can deploy the Library Book Request System successfully.	2	Medium

Sprint Summary

Sprint	Epic / Theme	Total Story Points	Priority
Sprint-1	Book Request Form, Date Validation, Request No., Notification	10	High
Sprint-2	Book Availability, Request Status, Librarian Approval	7	High
Sprint-3	Record Management, Reporting	4	Medium
Sprint-4	Security, Testing, Deployment	6	Medium/High

Story Point Reference (Fibonacci Scale)

Story Points	Meaning
1	Very Easy – trivial UI label or config change
2	Normal – standard CRUD operation or simple validation
3	Moderate – multi-field form with business logic
5	Difficult – complex integration or multi-system workflow
