

Ideation Phase

Define the Problem Statements

Date	29 June 2026
Team ID	Individual Project
Project Name	Library Book Request Management System
Maximum Marks	2 Marks

Customer Problem Statement Template:

The Customer Problem Statement helps identify the challenges faced by users and understand their requirements from a practical perspective. It focuses on the customer's goals, the obstacles they face, the reasons behind those challenges, and the expected solution. This analysis helps in designing a system that effectively addresses real-world problems.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Student	Request a library book online	The current process is manual and difficult to track	There is no centralized system for submitting and monitoring book requests	Frustrated and delayed
PS-2	A Librarian	Manage and respond to book requests efficiently	Book requests are received manually and records are difficult to maintain	The approval process is not automated	Overloaded and inefficient
